

# Differences between join and subquery

display employee names working at NEW YORK loc ?

join :-

```
select e.ename  
from emp e,dept d  
where e.deptno = d.deptno  
      and  
      d.loc='NEW YORK';
```

subquery :-

select ename

from emp

where deptno = (select deptno from dept where loc='NEW YORK')

Display employee names and dept names working at new york loc.

join :-

```
SELECT e.ename,d.dname
FROM emp e,dept d
WHERE e.deptno = d.deptno
      and
      d.loc='NEW YORK' ;
```
